

Galaxy converter: software option for FieldCommander® devices

Highlights

Galaxy is a popular alarm system that is being used in many security areas like building automation or industrial automation.

This Galaxy software option is a protocol converter, enabling the FieldCommander software to link to Galaxy devices.

Applications: Communication

- Extend your Galaxy-device with the FieldCommander communications options, like email; FTP; SMS or remote control.

Visualization

- Using FieldCommander and this software option it is now easy to link your Galaxy systems and visualize the system on a webpage.

Integration

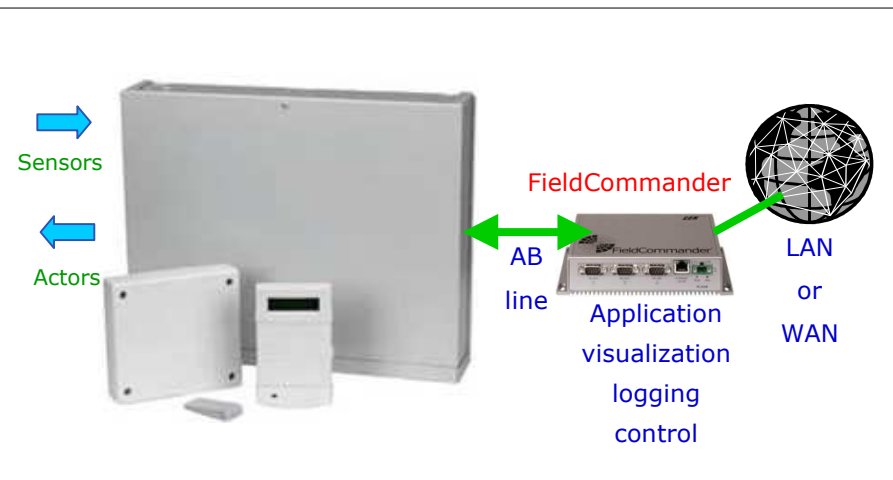

- Your Galaxy system can now be integrated with other systems.

Monitoring, alerting and reporting

- Monitor Galaxy systems and extend them with alerting and reporting possibilities using the FieldCommander technology.

FieldCommander script

- script example included
- support for many dedicated FieldCommander functions included.

System requirements:

Communication

- at least 1 free RS485 communication port is required (if your application requires linking to several AB-lines, also several free RS485 communications ports are required).

FieldCommander software

- at least 1 free convertercomponent in your FieldCommander sw is required (depending on application more free slots can be required).

Important !

Options must be ordered with a FieldCommander system.
Option software will be installed on 1 FieldCommander system.
Several options can be installed on 1 FieldCommander system.
For max. number of options please check your system spec.

Galaxy is a registered trademark of Ademco/Microtech Ltd; now Honeywell .

Order info

FCopt020
