

# RFID: Wavetrend converter: software option for FieldCommander® devices

## Highlights

RFID is a young technology, created to support low-power but active wireless tags used in security automation.

This software option is a protocol converter, enabling the FieldCommander software to link to Wavetrend RFID devices.

## Applications: Communication

- Extend your RFID-device with the FieldCommander communications options, like email; FTP; SMS or remote control.

## Visualization

- Using FieldCommander and this software option it is now easy to link your RFID device and visualize the system on a webpage.

## Integration

- Your RFID device can now be integrated with other systems.

## Monitoring, alerting and reporting

- Monitor RFID devices and extend them with alerting and reporting possibilities using the FieldCommander technology.

## FieldCommander script

- script example included
- support for many dedicated FieldCommander functions included.

### Extra/New

- Communicate with RFID devices
- Support extra functionality to your RFID devices
- Support linking systems

### Enable integration

- Link RFID devices to all other kind of devices FieldCommander is supporting. FieldCommander can be your gateway to other systems

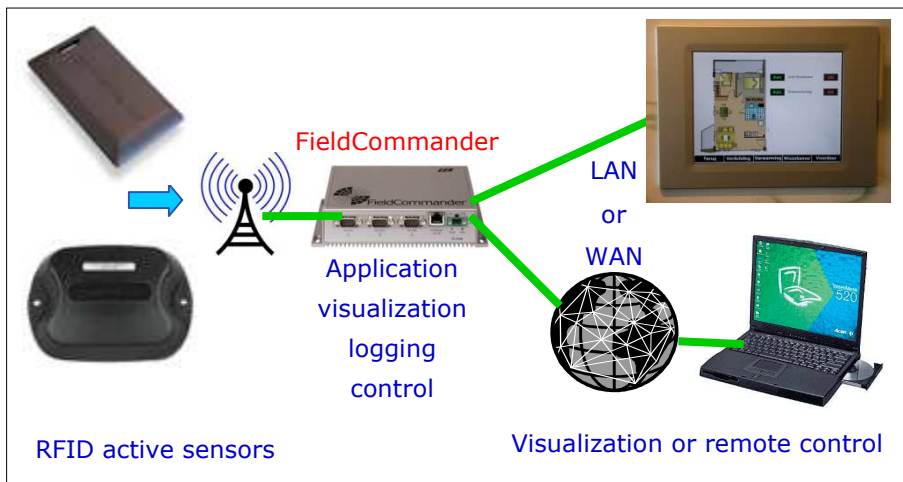

### Support details

- support RFID for sensors and actors
- Supports RFID bidirectional
- 1 license for 1 FieldCommander; no license restrictions for RFID devices.

### Content

- Protocol converter software
- Driver software
- RFID adapter (interface) included.

## System requirements:

### Communication

- at least 1 free RS485 port is required

### FieldCommander software

- at least 1 free converter component in your FieldCommander sw is required (depending on application more free slots can be required).

### Important !

Options must be ordered with a FieldCommander system.  
Option software will be installed on 1 FieldCommander system.  
Several options can be installed on 1 FieldCommander system.  
For max. number of options please check your system spec.

Wavetrend is a registered trademark of Wavetrend Technologies.
